

## C. LISTENING SKILLS

### **C5 Guess What I Say**

*Skills practiced:* listening; describing; using words.

*Needed:* Nothing.

*Activity:* Have students guess the familiar object from your description of it.

Begin with descriptions that are very general (it is square, for example).

Then make the descriptions more specific (it is red with green dots and a blue top and is right behind me on the desk).

When the students guess correctly, show the object.

Give a few students a turn at describing something.
